

WELCOME!

"Welcome to your patient centered medical home! Here, you are the architect, painter, and creator of a healthier better you.

When I first started this health center, I dreamt of an oasis where individuals from our community can visit, feel safe, and address their healthcare needs, a place where you'd be treated like family.

In 2016, we became a federally qualified health center look-alike! This certification allowed us to exponentially increase the types of services we could offer patients; like free transportation.

I believe health is more than doctors and medicine; it's food security, shelter linkage and other social determinants. Families Together will not solve these completely, but we will do our part in addressing them.

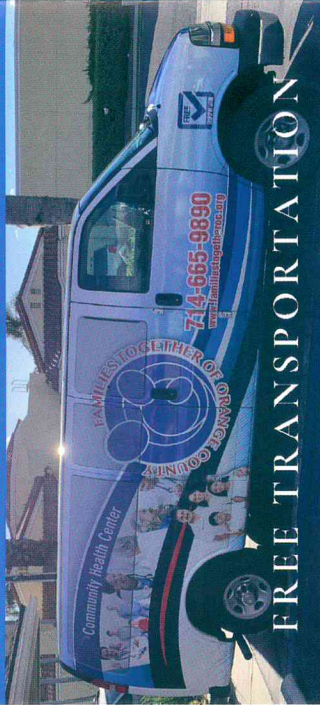

I believe we can deliver better healthcare than just your ordinary neighborhood clinic; in fact I know we can. Thank you so much for supporting Families Together and I look forward to helping!

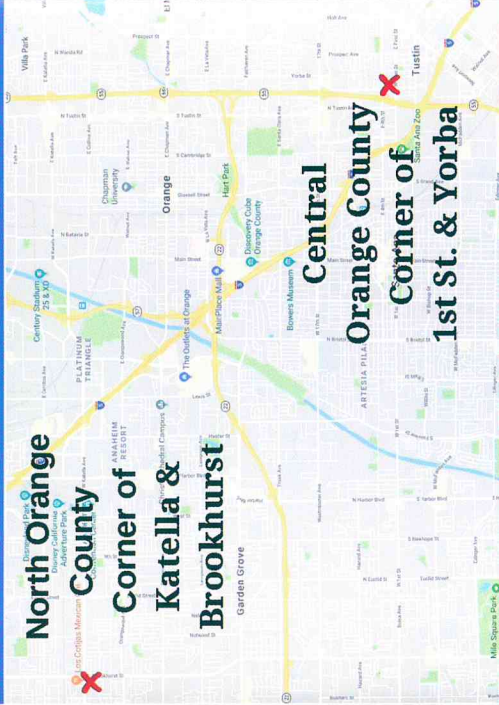

Alexander Rossel
Chief Executive Officer

God Bless!"
